Also see the [NC3Rs website](#) for more information about handling tubes.

- Running wheel for mice, easily attachable/detachable to IVC and conventional cage lids
- Suspended above the cage floor, giving mice more space to move through their cage
- Made from polycarbonate
- Autoclavable to 121°C and cagewasher safe

Product code: MOUSEWHEEL

Specifications: Length 140 mm x diameter 140 mm

Available in: Singles.

- Wet diet feeder "Nombbrero" provides clean and accessible wet, ground or treat diet
- The shallow bowl part is designed to contain diet so it does not come into contact with the cage bedding but still is easily accessible to the mice
- Designed to hang from the cage lid so it does not tip over
- Reduces costs by avoiding soiled diet
- Improves and refines welfare standards
- Creates an additional mobile platform/ refuge
- Stackable design perfect for easy storage
- Made from polycarbonate
- Autoclavable to 121°C and cagewasher safe

Product code: NOMBRERO

Specifications: Height 108 mm x diameter 80 mm.

Available in: Packs of 10 pieces.

- Allows you to suspend a play tunnel on the cage lid
- A raised cardboard tunnel is far more desirable than one on the floor, as it offers a warm secure space as well as a refuge from aggressors
- Made from polycarbonate
- Autoclavable to 121°C and cagewasher safe
- Available in 2 sizes

Product code: SZPCTC

Specifications: Suitable for diameter 38 mm tunnels.

Product code: SZPCTC-LRG

Specifications: Suitable for diameter 51 mm tunnels.

Available in: Packs of 100 pieces.
